Introduction

Leslie Electrical Services is a trusted industrial electrical contractor supporting manufacturing and processing businesses across Victoria.

Our team specialises in electrical infrastructure, automation systems and machine safety solutions designed specifically for industrial environments where reliability, safety and uptime are critical.

With extensive experience across manufacturing, food processing, beverage production and industrial facilities, we deliver practical electrical solutions that minimise downtime, improve production performance and ensure compliance with Australian safety standards.

From plant upgrades and automation integration to preventative maintenance and breakdown support, Leslie Electrical Services partners with industrial operators to keep critical systems running safely and efficiently.

Our Core Capabilities

When machines stop, production stops. Downtime costs thousands. Missed deadlines break trust. And "near enough" just isn't good enough when safety and productivity are on the line. Our accredited industrial electricians aim to keep your operations running smoothly. Our core capabilities comprise:

Industrial Electrical Installations

Electrical infrastructure installations for factories, plants and warehouses, including machine wiring, plant upgrades and power systems.

Automation & PLC Systems

Automation integration and PLC programming to improve production performance and operational control.

Switchboards & Electrical Distribution

Design, installation and maintenance of switchboards and electrical distribution systems.

Machine & Plant Safety

Electrical safety systems are designed to protect workers and ensure compliance with Australian standards.

Preventative Maintenance

Proactive maintenance programs to prevent electrical faults and keep plant equipment operating efficiently.

24/7 Emergency Support

Rapid response breakdown services when electrical failures threaten production.

Industries We Support

Leslie Electrical Services works with clients across a range of industrial sectors, including: manufacturing, food processing, beverage production, warehousing & logistics, industrial processing plants, and advanced manufacturing.

Our electricians understand the operational demands of production environments and work closely with maintenance managers, engineers and plant operators to deliver reliable electrical solutions that support continuous operations.

Why Leslie Electrical Services

Industry Experience

Our electricians work exclusively in industrial environments and understand the operational challenges faced by manufacturing and processing businesses.

Automation & Control Expertise

From PLC programming to integrated electrical systems, we help our clients optimise production performance through smarter automation.

Reliable Service

We understand that electrical failures can halt production. Our team responds quickly and works efficiently to restore operations.

Safety & Compliance

Machine safety and electrical compliance are central to everything we deliver. Our systems are designed to meet Australian safety standards and protect workers.

Long-Term Partnerships

We focus on building long-term relationships with our clients by delivering exceptional service, technical expertise and dependable support.

Reliable & Trusted

Trust has been built through demonstrating competence, reliability, and honesty with our valued clients:

Reliable, safe, and smart
electrical & automation
solutions for industrial
and manufacturing sites.
